
bluetooth modem V551 Bluetooth modem - Also USB same phone, same PC??

Posted by Ron - 2009/04/06 11:30

I can't use the bluetooth headset while the bluetooth modem is active. Can I alternate between the bluetooth and USB connections with the same Motorola V551 handset to the database in PhoneTools?? Does PhoneTools need to see this USB connection as a different phone?? How should I set it up in Phone Tools now that I already have bluetooth setup. Thanks!! Peace, Ron!

I can't use the bluetooth headset while the bluetooth modem is active. True of most cell phones and other low-end devices
